Professional Summary

Entry-level Java Full Stack Developer with hands-on experience in building RESTful web applications using Java, Spring Boot, Hibernate, and MySQL. Strong understanding of backend development, API design and database integration. Passionate about writing clean code, solving problems, and contributing to scalable software solutions in a professional environment.

Technical Skills

Backend Technologies: Java, Spring, Spring Boot, Hibernate, REST APIs
Frontend Technologies: HTML, CSS, JavaScript, React
Database: MySQL
Tools: Maven, Postman, Git, GitHub, Eclipse, VS Code, Linux
Concepts: OOPs, MVC, Data Structure, Exception Handling

Education

Bachelor Of Science in Computer Science (CGPA: 7.73) 2022 – 2025
Chandmal Tarachand Bora College, Shirur

Higher Secondary Certification (75.33%) 2020 – 2021
Shri Mulika Devi Vidya Mandir, Nighoj

Secondary School Certification (83.20%) 2018 – 2019
Shri Mulika Devi Vidya Mandir, Nighoj

Projects

1. Smart Resource Tracking System | Technologies: Java, Spring Boot, REST API, MySQL
Description:

- Created a RESTful web application to track and manage 5+ types of system resources including allocation, usage and availability.
- Designed backend using Spring Boot and Hibernate to handle 1,000+ resource records efficiently.
- Developed 8+ secure REST API endpoints to perform CRUD operations on resource data.
- Integrated MySQL database to store and retrieve resource information, reducing data access time by 30% through optimized queries.
- Implemented validation and exception handling to ensure reliable data processing.
- Performed API testing using Postman to validate responses and ensure 100% endpoint accuracy.

2. Cake Craft – Smart Bakery Management System | Technologies: Java, Spring Boot, REST API, MySQL
Description:

- Developed a web-based application to manage 50+ cake items including flavours, weights, quantities.
- Built CRUD functionality for adding, updating, and deleting cake records
- Engineered 10+ RESTful API endpoints using Spring Boot which automated cake inventory and order processing, enabling real-time stock updates, resulting in a 15% decrease in order processing times.
- Designed and maintained MySQL database schema for cakes, orders, and inventory with 3+ relational tables.
- Automated stock deduction after each purchase, improving inventory accuracy by 20%.
- Tested and validated all API endpoints using Postman, ensuring smooth communication between frontend and backend

Certifications

1. Full Stack Java Development – The Kiran Academy
2. Java Programming Course – Crio
3. Career Skills in Software Development – LinkedIn
